

Douglas Barbosa

Full Stack Software Engineer | .NET, APIs & Scalable Systems | [linkedin.com/in/douglas-dev/](https://www.linkedin.com/in/douglas-dev/)
Dublin, Ireland | Contact via website or LinkedIn | www.douglasbarbosa.com

PROFESSIONAL SUMMARY

Full Stack Engineer with 6+ years developing enterprise systems in .NET Core and Node.js, backed by 10 years across IT operations, infrastructure and product. Builds scalable backend services and REST/GraphQL APIs on microservices architectures, with React and TypeScript on the front end and SQL Server, PostgreSQL and MongoDB behind them.

Works across the full lifecycle rather than a single stage: leads solution design with product managers, architects and clients, ships through CI/CD pipelines, and supports systems in production — including Level 3 backlogs, where ticket queues were cut by ~90%.

At Funcional Health Tech, delivered 100+ features on healthcare platforms processing 1M+ daily transactions and reduced static-analysis debt by ~20%. Mentors junior engineers and advises on architecture decisions. BSc in Information Systems.

TECHNICAL SKILLS EXPERIENCED

Frontend: ReactJS, TypeScript, Next.js, Angular, JavaScript

Backend: C#, .NET Core, .NET Framework, ASP.NET, Node.js

API Development & Integration: REST APIs, GraphQL, Swagger

Database Management: SQL Server, MongoDB, PostgreSQL

DevOps & CI/CD: GitLab CI/CD, Docker, Kubernetes, Jenkins

Testing & Quality Assurance: Unit Testing, Integration Testing, SonarLint

Version Control & Code Review: Git, GitLab, GitHub

Software Architectures: Microservices, Monolithic

Agile & Project Management: Jira, Trello, Scrum, Kanban, Sprint Planning

WORK EXPERIENCE

SOFTWARE ENGINEERING CONSULTANT (FREELANCE)

Freelance | Remote (Ireland / Europe)

August 2025 – Present

- Led the technical assessment and development of a client mobile application, supporting developer hiring and defining the development roadmap.
- Coordinated feature delivery, including task definition, code review, and validation to ensure quality and business alignment.
- Provided technical guidance and access management, improving team efficiency and delivery standards.

SOFTWARE ENGINEER | FULL STACK (.NET - Node.js - NestJS)

Funcional Health Tech – Remote (Dublin, Ireland)

November 2021 – July 2025

- Delivered 100+ features for enterprise systems processing 1M+ daily transactions, using .NET Core, REST APIs, and NestJS.

- Optimised APIs and microservices performance through refactoring and architecture improvements, reducing technical debt and static analysis warnings by ~20%.
- Owned the full SDLC: planning, development, testing, code review, and CI/CD deployment (GitLab, IIS).
- Mentored junior developers and supported product owners and engineers in critical technical decisions.

SOFTWARE DEVELOPER | .NET FULL STACK

Nicephotos – São Paulo, Brazil | Hybrid

January 2020 – November 2021

- Maintained and improved backend services using .NET Framework and frontend applications with ReactJS.
- Contributed to platform modernisation, introducing Angular for internal photo editing tools.
- Integrated marketing automation and dynamic campaign content with the platform.
- Improved eCommerce workflows, including shopping cart, email automation, and customer engagement features.

PRODUCT OWNER / IT OPS MANAGER / PROJECT MANAGER

Alexian Brothers Online

November 2014 – July 2019 | Macaé, Brazil | On-site

- **Product Owner (2018–2019):** Defined product vision and roadmap for a Language Learning Platform and mobile app, aligning business goals with user needs.
- **IT Operations Manager (2015–2018):** Managed infrastructure, suppliers, and critical IT services, improving operational efficiency and system reliability.
- **Project Manager (2014–2015):** Led third-party development projects including QR Code attendance, biometric control, and a student management portal.
- Oversaw testing, system validation, and employee training to ensure successful product adoption.
- Transitioned from project and operations roles into software engineering, building strong technical and product expertise.

PROJECTS

Three Tone English (AI Writing Assistant) - Built with Next.js and OpenAI APIs.
